PROFESSIONAL SUMMARY

Final-year B.Tech Computer Science student (2026) with hands-on experience in full-stack web development, RESTful API design, and real-time applications. Proven ability to independently build and troubleshoot production-grade systems. Strong foundation in data structures, algorithms, operating systems, and computer networks. Seeking software engineering roles where I can contribute effectively and grow in a fast-paced environment.

EDUCATION

B.Tech in Computer Science *2022 – 2026*
LNCTS, Bhopal | RGPV University
CGPA: 7.66
Relevant Coursework: Data Structures & Algorithms, Operating Systems, DBMS, Computer Networks, OOP

12th Grade (MP Board) *2021 – 2022*
Touch Stone Public School, Gohad
Percentage: 70.4%

TECHNICAL SKILLS

Languages: C++, JavaScript (ES6+), SQL
Frontend: React.js, HTML5, CSS3, Tailwind CSS, EJS
Backend: Node.js, Express.js, RESTful API Design, JWT Authentication, Socket.io
Databases: MongoDB, MySQL
Tools: Postman, VS Code, npm, Git, GitHub
Core CS: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks

WORK EXPERIENCE

Freelance Full-Stack Developer *2024 – Present*
Trisect Global | *Global Education Council*

- Built and deployed responsive, production-ready full-stack web applications using Node.js, Express.js, MongoDB, EJS, HTML, and CSS for two clients.
- Designed and implemented RESTful APIs for authentication, user management, and core application workflows; tested all endpoints with Postman.
- Integrated Nodemailer for automated transactional email communication, diagnosing and resolving SMTP configuration and delivery issues end-to-end.
- Independently managed the full development lifecycle — from requirement gathering and system design to deployment and post-launch support.

PROJECTS

ExpertLancer – Full-Stack Freelancing Platform | Live Demo | GitHub 2024
Node.js | Express.js | MongoDB | Socket.io | AWS EC2 | Nginx | JWT | Tailwind CSS

- Designed and built a full-stack freelancing platform where users can post projects and hire freelancers by category, handling the complete backend architecture from schema design to API layer.
- Implemented JWT-based authentication, category-based smart matching, and real-time community chat using Socket.io, enabling live user engagement.
- Built RESTful APIs for project posting, user management, and hiring workflows; used Postman for API testing, regression checks, and debugging.

- Deployed on AWS EC2; configured Nginx as reverse proxy, PM2 for process management, and security groups for a secure, scalable production environment.
- Diagnosed and resolved real-time Socket.io connectivity issues and authentication edge cases in live production, gaining hands-on distributed systems debugging experience.

CineVerse – Movie Recommendation Web Application | Live Demo | GitHub 2024

React.js | Tailwind CSS | External REST APIs | React Hooks

- Built a responsive React.js web application for browsing movies, TV shows, and actor profiles using external movie APIs.
- Implemented dynamic search, category filtering, and React Router-based navigation for seamless content discovery.
- Optimized API call patterns using React Hooks (useEffect, useState) to reduce redundant network requests and improve performance.
- Designed a clean, mobile-responsive UI with Tailwind CSS, prioritizing usability across device sizes.

CERTIFICATIONS

- Full Stack Web Development – Frontend & Backend (Certificate)
- Introduction to Databases – Meta, Coursera
- Version Control – Meta, Coursera

LEADERSHIP & ACTIVITIES

- **Team Lead, The Orator's Club – LNCT:** Managed club operations, coordinated public speaking events, and led a team of members — demonstrating ownership, communication, and organizational skills.
- **Volunteer, Google Developer Student Club (GDSC) – LNCTS:** Assisted in organizing technical workshops and coding events; collaborated cross-functionally to promote developer skills and community learning.
